## ABOUT SOCIAL HEALTH INSURANCE IN INDONESIA

Social health insurance for the poor in Indonesia is managed by Badan Penyelenggara Jaminan Sosial (BPJS) for Health. Through BPJS, underprivileged citizens can access basic health services such as medical examinations, medicines, and inpatient care without being burdened by unaffordable costs.

Limited public access to information about health insurance is one of the reasons why many people do not have BPJS. When people cannot afford to pay their own BPJS contributions, they should be entitled to BPJS PBI (government social insurance). However, this information is still limited to the poor and many of them are unable to apply due to complicated bureaucratic issues.

### FACT

Based on data from the Central Statistics Agency (BPS), from the results of the March 2023 National Socio-Economic Survey (Susenas), 61.54% of the Indonesian population or around 159.10 million people have health insurance. Meanwhile, 38.46% of the Indonesian population or around 91.90 million people do not have health insurance.

## "A MOTHER'S HOPE: TASYA'S JOURNEY TO HEALTH."

Tasya was a bright-eyed young girl, the beloved daughter of Rani, a hardworking mother who had moved from her hometown to Yogyakarta many years ago in search of a better life. Tasya had always been a vibrant and energetic child, but lately, she had been suffering from chronic tonsil infections that left her in pain and discomfort. Rani knew that her daughter needed surgery to remove her tonsils, but their financial situation was dire, and they couldn't afford the medical expenses.

Desperate to find a solution, Rani tried to secure health insurance for Tasya, but she encountered obstacles at every turn. Despite living in Yogyakarta for years, they were still considered outsiders, and can not manage to get public health insurance to provide coverage. Rani felt defeated, watching her daughter's health deteriorate day by day.

One day, while sharing their story with a friend, Rani learned about Harapan Fian, a local organization dedicated to helping families like theirs. With renewed hope, Rani reached out to Harapan Fian, explaining their predicament. The organization recognized the urgency of Tasya's condition and decided to assist them in obtaining the necessary health insurance.

With the support of Harapan Fian, Rani and Tasya finally obtained the health insurance they needed. The day of Tasya's surgery arrived, and Rani watched anxiously as her daughter was wheeled into the operating room. It was a nerve-wracking wait, but the surgery was successful, and Tasya emerged from it healthier and happier than she had been in months.

Rani couldn't thank Harapan Fian enough for their help and support during their most challenging time. With Tasya's health restored, the mother and daughter could now look forward to a brighter future in Yogyakarta, grateful for the kindness of strangers who had come to their aid in their time of need.
